

# Avenis 125

## The Urban Arrow

From the sharp lines of its striking face to its sleek, upswept tail, your eyes are treated to styling that evokes a visual sense of speed and the promise of an exciting ride. Pull away from the curb and you soon discover its impressive acceleration, smooth ride, and ability to maneuver effortlessly through traffic. And all this while achieving optimum fuel economy and low CO<sub>2</sub> emissions. The Avenis 125 is an excellent choice to fit most any scooter need, be it commuting, running errands, or just getting out to enjoy an exhilarating run around town.

### Key Features

**The full digital multifunction instrument panel** provides all the information the rider needs and contributes to the cutting-edge styling of the Avenis 125.

**The 21.5L underseat utility compartment** provides convenient space for storing shopping bags, rain gear, or other items.

**The left-side front compartment and quick-access inner pocket on the right side** offer convenient storage for small items you may want to keep close at hand. **A handy 2A USB outlet** located inside the left compartment also lets you recharge your smartphone while out riding.

**An extra switch on the left brake lever** offers enhanced comfort and convenience by letting you lock the rear wheel to keep the Avenis 125 in place when you stop.

**The Avenis 125's SEP engine** is engineered to deliver strong low-end torque and quick acceleration, while also achieving optimum fuel economy and Euro 5 compliant low emissions.

**Dramatic and energetic urban styling** is evident in every detail, with edgy, dynamically contoured body lines, attractive contrasting color accents, and black metallic-finish badging.

### Engine Features

**Suzuki Eco Performance (SEP)** is the development concept behind a new generation of engines that optimize all aspects of engine efficiency to bring you a superb balance of environmentally

responsible operation and thoroughly satisfying performance.

**Fuel consumption** is a low 1.9L/100km (52.6km/L)\* and **CO<sub>2</sub> emissions** measure a mere 44g/km\* in WMTC mode testing.

**The SEP engine** performs brilliantly, delivering impressive acceleration and instant response to a subtle twist of the throttle. Its powerful torque output excels in stop-and-go traffic, even when carrying a passenger.

The engine produces peak horsepower of 6.4kW and maximum torque of 10.0N·m at low rpm to deliver responsive performance that makes the Avenis 125 a pleasure to ride.

**The engine's SOHC air-cooled design** makes it a reliable powerplant that is easy to maintain and economical to run. Moreover, it is compact and lightweight, a feature that contributes to realizing more nimble handling, and to maximizing rider comfort and utility.

\* Actual fuel consumption and CO<sub>2</sub> emissions may differ owing to conditions such as the weather, road, rider behavior and maintenance.

### Chassis Features

The Avenis 125 chassis is engineered to maximize the potential of its SEP engine. It features a nimble and agile package that is highly maneuverable, easy to handle and comfortable to ride.

**The medium setting for the front suspension** helps realize a smooth ride. The front and rear

suspension are both finely tuned and carefully matched to the tires and wheels to achieve a fine balance of stability, solid road-holding performance, nimble handling, and comfort.

Sporty alloy wheels shod with tubeless tires help deliver superior running performance and positive grip on wet surfaces. Well suited to European road conditions, these tires contribute to a smooth ride, even on cobblestones.

**Suzuki's Combined Brake System\*** supports well-balanced braking by distributing braking force to both the front and rear wheels when you squeeze the left-hand brake lever.

**A 190mm diameter disc brake** in the front and **120mm drum brake** in the rear contribute to providing stable stopping power.

The Avenis 125 rides on a **short wheelbase** that contributes to ease of maneuverability and works in conjunction with the light, slim design to offer easier, more nimble handling on city streets.

Thanks to its ample **160 mm ground clearance\*\***, the Avenis 125 handles speed bumps and other bumps in the road with ease. And it does this while combining with an optimized seat shape that helps make it easy to place both feet on the ground.

**The 5.2-liter fuel tank** works in conjunction with the fuel-efficient engine to achieve a liberating riding range of approximately 274 kilometers\*\*\* that goes easier on your wallet and helps reduce the frequency and associated hassle of refueling stops.

**The stylish two-tone seat** with attractive red stitching affords both you and your passenger a pleasant ride. It is long and well-padded, firm yet comfortable, and covered in a richly textured surface that provides a secure grip when riding.

**The generously proportioned floorboard** helps enable you to maintain a comfortable riding position, while its convenient **cut-away design** makes it easy to place both feet firmly on the ground when stopped.

**The hinged design of the tail-mounted fuel cap** means you can refuel without having to open the seat or hold the cap. As an added benefit, its positioning helps avoid soiling the floorboard or bags that might be hanging from the utility hooks when refueling.

Independent right and left **aluminum grab bars**, featuring a stylish, edgy design, combine with aluminum footrests to help enhance pillion rider comfort.

**A hugger-type inner fender** rides just above the rear tire to improve splash protection and enhance the Avenis 125's athletic appearance. The lightweight front fender contributes to steering ease and the sharp styling of the face.

**A tinted meter visor** floats slightly above the handlebar cowling, enhancing the sharp styling of the front end and conveying the Avenis 125's eagerness to perform.

\* The Combined Brake System is intended only to assist braking operation. We strongly recommend that riders normally use both brake levers to control the front

## Utility Features

**Handy front compartments\*** are designed to maximize convenience and utility. The left-side compartment is large enough to accommodate a large-screen smartphone and includes a lid that closes to offer extra protection against the elements. On the right side is a quick-access inner pocket that offers enough storage capacity to hold a 500ml beverage or other small items you may want to keep close at hand.

The Avenir 125 is equipped with a **2A USB outlet\*\*** you can use to charge your smartphone on the go. It is conveniently located inside the left-side front compartment, above the tray on which you can rest your phone. An attractive blue LED surrounding it remains lit as long as the ignition is turned on, making the outlet easy to locate at night or in other dark conditions.

With a practical design and capacity of 21.5L, **the underseat utility compartment\*\*\*** provides convenient space to store shopping bags, rain gear, or other items and protect them from the elements.

**A pair of sturdy utility hooks\*\*\*\*** let you hang various items, including shopping bags, up front with you. The back hook can be locked to better secure items, and can be folded out of the way when not in use.

The **Suzuki Easy Start System**, you can start the engine with one quick push of a button and be on your way. A single switch that controls both the start and stop functions is conveniently located on the right handlebar for easy operation.

**Rear brake lock** makes it easy to lock the rear wheel and keep the Avenir 125 in place when you stop. The function is activated using the dedicated switch on the left brake lever.

**An extra switch on the left brake lever** offers enhanced comfort and convenience by letting you lock the rear wheel to keep the Avenir 125 in place when you stop.

**Suzuki's side stand interlock system** prevents engine ignition while the stand is down to protect you against carelessly starting off with it extended.

Both a **center stand** and side stand are included as standard equipment.

**The theft deterrent key system** lets you quickly access the ignition key hole using a magnetic mechanism coded to your key, even when wearing gloves. And the shutter closes again with a simple push of a button. There is also a handy function that opens the seat with the key still in the ignition.

\* Stowed items are shown for illustrative purposes only.

\* The weight limit for each compartment is 0.5kg.

\* Do not use the front compartments to store items that are fragile, valuable, dangerous, or susceptible to heat.

\* Do not keep electronic equipment in the front compartments while riding as the vibration may cause damage.

\* Items may be displaced depending on their shape and riding conditions.

\* Be sure to keep the front left compartment lid closed while riding.

\*\* Using the USB outlet while the engine is idling or stopped may drain the battery. Be aware of battery drain when using the USB outlet.

\*\* Failure to observe the following instructions may result in damage to the scooter or connected device.

\*\* Do not connect any electronic device other than a smartphone.

\*\* Do not use when washing the scooter or when it is raining.

\*\* Reattach the cap when the outlet is not in use.

\*\*\* The weight limit for items in the underseat compartment is 3kg.

\*\*\* Do not use the compartment to store items that are fragile, valuable, dangerous, or susceptible to heat.

\*\*\*\* The weight limit for each hook is 1.5kg.

## Electrical Features

**Bright, long-lasting, low-power LEDs** help you see the road ahead better at night, even when cornering. The low body-mounted headlight assembly features a distinctive stacked design that houses three LED low beam lights up top and two LED high beam lights below.

Flanking the headlight are vertically-oriented **LED position**

**lights** integrated into the assembly to add a striking accent with a premium-class feel.

**The front turn signals** are integrated into the handlebars to make them highly visible to drivers and pedestrians approaching from the front or side.

The Avenir 125's **upswept tail lines** culminate with a pair of independent high-mounted LED rear combination lights. Rear turn signals extending from a lower position take their cue from sportbike designs.

The full digital instrument panel for the Avenir 125 features a

compact LCD screen with a clean and intuitive layout that clearly displays all the information you require in real time. The panel is illuminated to maximize visibility both day and night.

**The Suzuki Eco Drive Indicator\*** on the instrument cluster lights up when the scooter is being ridden in a fuel-efficient manner, offering instant feedback that can help you learn techniques for maximizing fuel economy.

\* The Eco Drive Indicator does not automatically improve fuel economy but may help riders refine their riding efficiency and improve fuel consumption.

## Born to Fly Straight and True

## Genuine Accessory

Genuine Accessory available for the Avenir 125 include knuckle covers that complement the appearance by adding stylish flair and providing a sportier look.

### Knuckle Covers

The knuckle covers complement the appearance of the Avenir 125 by adding stylish flair and providing a sportier look.

### Plastic Top Case (27L)

A large-capacity top case adorned with the SUZUKI logo is available for the Avenir125.

Maximum load: 3kg / Capacity: 27L

Note: The separately sold top case adapter plate is required to install this accessory.

### Cushion for Top Case

This accessory provides well-cushioned padding where the passenger's back meets the top case. Improves the riding comfort of the passenger.

Note: SUZUKI MOTOR CORPORATION reserves the right to change the design or discontinue any Suzuki Genuine Accessory at any time without notice. Some Suzuki Genuine Accessories might not be compatible with local standards or statutory requirements. Please check with your local AUTHORIZED SUZUKI DEALER for details at the time of ordering.
